

The Flower Cycle

(Tune: Farmer In The Dell)

The cycle of life (Repeat)

Plants make seeds to grow new plants, the cycle of life.

The seed drops to the ground. (Repeat)

Once a year and every year the seed drops to the ground

The sun starts to shine. (Repeat)

Once the day time has begun, the sun starts to shine.

The water starts to flow. (Repeat)

The weather brings along the rain, the water starts to flow.

A root starts to grow. (Repeat)

It pushes down into the soil, the root starts to grow.

The stem pushes up. (Repeat)

It pushes up above the soil, the stem pushes up.

The leaves start to grow. (Repeat)

With water and sun they make the food, the leaves start to grow.

A flower opens up. (Repeat)

Attracting insects from afar, the flower opens up.

An insect comes along. (Repeat)

It pollinates the flower well, an insect comes along.

The seeds start to grow. (Repeat)

A promise is inside each seed, the seeds start to grow.

The flower bends down low. (Repeat)

It finds a way to drop its seeds, the flower bends down low.

The plant's life is done. (Repeat)

The seeds still hold a promise inside, but the plant's life is done.

The cycle of life (Repeat)

Plants make seeds to grow new plants, the cycle of life.
