

Name \_\_\_\_\_ Date \_\_\_\_\_

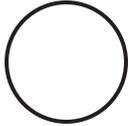

## Moon Home Observation Page

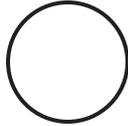

Draw the four main phases of the moon. Remember to shade the dark portion.

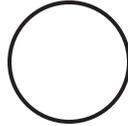

new moon

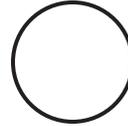

first quarter

full moon

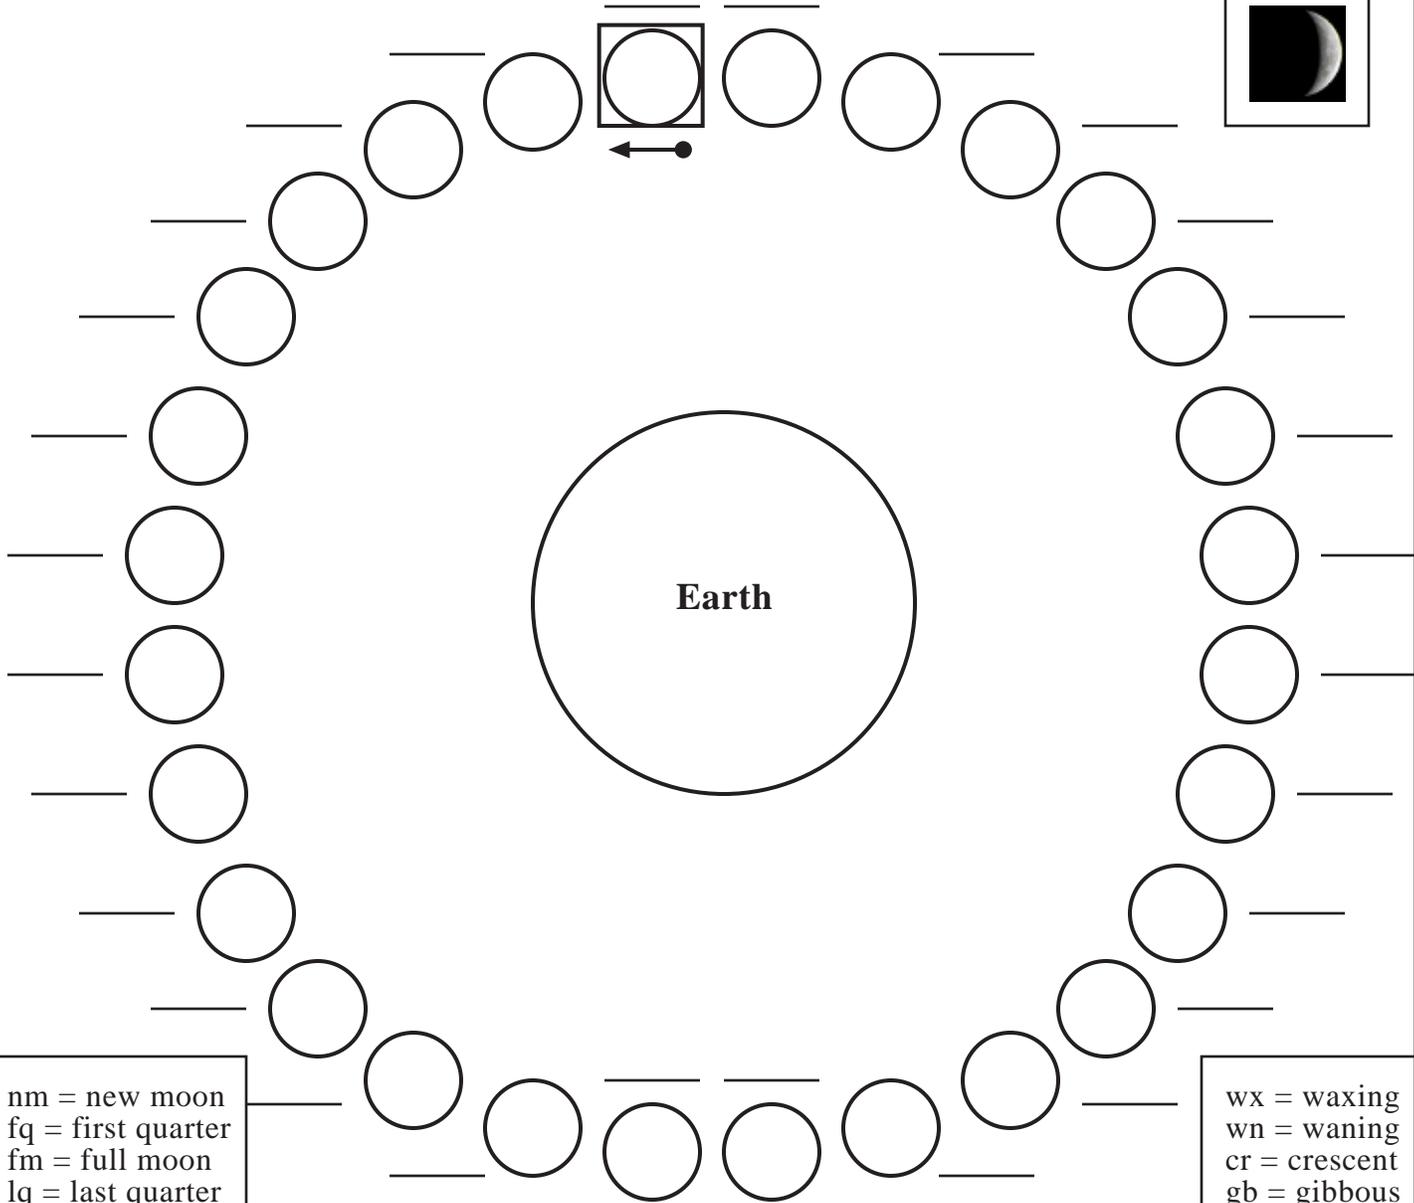

last quarter

Consult your moonrise/moonset chart for observation times. Begin recording observations at the circle with the box around it. Move counterclockwise around the circle each day. Enter data on the lines for each moon observation using the key below. The example to the right shows a waxing crescent moon for March 4th.

3/4 wxcr

nm = new moon  
 fq = first quarter  
 fm = full moon  
 lq = last quarter

wx = waxing  
 wn = waning  
 cr = crescent  
 gb = gibbous
