

The Water Cycle Background Information

Physical vs Chemical Change

Directions: Compare the characteristics of physical and chemical change, then answer the question below.

Physical Change

- --The physical properties (the way it looks, smells, feels, etc.) may or may not change
- --The change may be reversible.
- --A new substance *is not* produced.

Examples:

- --cutting logs to make firewood
- --falling leaves from a tree
- --mining bauxite from the ground

Chemical Change

- -- The physical properties change.
- --The change is not reversible
- --A new substance *is* produced.

Examples:

- --burning firewood to make carbon and heat
- --composting leaves into soil
- --making aluminum from bauxite.

Is water cycling a physical or chemical change?
