

Water Travels in a Cycle

(Tune: *She'll Be Comin' Round the Mountain*)

*Water travels in a cycle. Yes, it does!
Water travels in a cycle. Yes, it does!
It goes up as evaporation,
Forms clouds as condensation,
And comes down as precipitation. Yes, it does!*

Source: *The Mailbox 1999-2000 Yearbook*

Water Cycle Processes

evaporation: the changing of a liquid into a gas

condensation: the changing of water vapor from a gas to a liquid

precipitation: the falling of water to the earth as rain, snow, sleet, or hail

collection: the pooling of water on the ground in puddles, streams, lakes, oceans, etc.

Other Processes

percolation: the mixing of water with soil

transpiration: the giving off of water vapor by plants
